Invitation to the Public Participation Process: Gerus – Mururani Gate Power line

Dear Sir / Madam,

NamPower proposes to construct a new 400kV power line, for which an Environmental Assessment has been completed. The power line route runs from Otjikoto (west of Tsumeb) via Rundu to Katima Mulilo. In support of the proposed transmission line, a second 350kV High Voltage Direct Current (HVDC) transmission line has been proposed. **This transmission line will run from Gerus (north of Otjiwarongo) to Mururani Gate.** Eco.plan has been appointed by NamPower to undertake an Environmental Assessment for the transmission line.

A map representing the proposed power line route and the farm boundaries is attached. Please would you take note of the position of your farm in relation to the proposed route and contact us regarding any concerns or issues you may have. I would also request that you inform your neighboring farmers on the proposed route in order to ensure that all affected parties are informed.

We are holding two focus group meetings for all affected farmers, the meetings will be held on the following dates:

- **Monday 19 June 2006: Otavi – Khorab Safari Lodge, from 3pm to 5pm; and**
- **Tuesday 20 June 2006: Grootfontein – Courtyard Guest House, from 9am to 11am.**

A Scoping Document will be produced and made available to Interested & Affected Parties (I&APs) for comment. If you wish to register as an I&AP, please forward your contact details by e-mail, fax or post or phone us: -
