RE: Helicopter Survey of Proposed Power Line Route.

Dear Sir / Madam,

NamPower proposes to construct a new 400kV power line, for which an Environmental Assessment has been completed. The power line route runs from Otjikoto (west of Tsumeb) via Rundu to Katima Mulilo. In support of the proposed transmission line, a second 350kV High Voltage Direct Current (HVDC) transmission line has been proposed. This transmission line will run from **Gerus (north of Otjiwarongo) to Mururani Gate**. Eco.plan has been appointed by NamPower to undertake an Environmental Assessment for the transmission line.

NamPower is going to be surveying the proposed power line route by helicopter over a two week period, between the 12th and the 23rd of June. Please be aware of this as the helicopter will be flying over your property.

If you have any queries or concerns please contact me on the contact details below.

Yours faithfully
for NamPower (Pty) Ltd

Leigh Bennett
