

## **Anixas Power Station retains its ISO9001:2025 Quality Management System (QMS) Certification**

Following the end of the three years' certification cycle in January 2025, the Anixas Power Station underwent an external rectification audit by Bureau Veritas Namibia (Pty) Ltd, an accredited international certification body. Consequently, NamPower is proud to announce that Anixas Power Station was found to have established and maintained its QMS, in line with the requirements of the ISO 9001:2015 standard and has demonstrated the ability of the system to achieve the requirements for services within the scope of NamPower- Anixas Power Station.

The prestige of the ISO 9001:2015 recertification lies in the ability of the Power Station to provide high quality services through stream-lined processes in compliance with applicable legal and regulatory requirements, defined policies and procedures. This is achieved while ensuring a high level of customer satisfaction, inspiring stakeholders' confidence and with a continuous improvement approach, in line with global best practices. The Anixas Power Station Manager, Petrus Kalangula is elated with the recertification. "The team remains committed to maintaining the prestigious certification as a testament to the unwavering commitment of their contribution to NamPower's organisational goals and objectives."
