**MEDIA RELEASE**

**Power Outage in the Central, Northern and Coastal areas of the country**

NamPower wishes to inform its customers and the public that a power outage was experienced in the Central, Northern and Coastal areas of the country today (8 October 2015) at 11:33.

The outage affected the whole of NamPower's transmission network system north of the Auas Substation, situated 40km east of Windhoek, from where these areas are supplied from. The cause of the outage is being investigated.

Electricity to the Central area of the country was restored within less than ten minutes, followed by the Coastal area, while power to the Northern region was restored after half an hour.

NamPower apologises to its customers and the public in general for any inconvenience that the power outage may have caused.
